

**ENGINEERING MECHANICS CURRICULUM**

**Secondary Field Options**

A list of secondary field options (<https://mechanical.illinois.edu/undergraduate/bs-engineering-mechanics>) can be found on the MechSE website. These options specify certain required courses and provide a list of approved courses from which to choose.

You may alternatively fashion an individualized secondary field option. To do this you will need to meet either with Stephanie Ott-Monsivais (152 CAB) or email [mehse-ug-advise@illinois.edu](mailto:mehse-ug-advise@illinois.edu) to schedule a meeting to obtain secondary field approval. The only requirements are that the courses be related to mechanics, form a coherent and cohesive group, include at least two engineering courses, and total at least 12 hours of advanced-level\* coursework that are distinct from required courses on the Engineering Mechanics flowsheet. Of the required 12 hours, at least 6 hours must be 400-level coursework with a maximum of 6 hours at the 300-level, unless otherwise approved.
